Saskatchewan Education

Employment Statistics Report

1986 Technical Institute Graduate Follow-up

Saskatchewan Education

1986 Employment Statistics Feedback Questionnaire

The Employment Statistics Report is distributed throughout the secondary and post-secondary school systems in Saskatchewan, as well as to public and private sector agencies. The report is based on the results of a survey of 1986 graduates of technical institutes in Saskatchewan.

Please provide the department with your comments and suggestions by completing this questionnaire and returning it to the address below.

1. To what extent do you find Employment Statistics Report useful?

   Very useful ☐ Moderately useful ☐ Not very useful ☐ Of no use ☐

2. Would you recommend that this report continue to be produced?

   Yes ☐ No ☐

3. What changes would you like to see in future reports?

4. Comments.

Appendix - 1986 Survey Questionnaire 117

BACKGROUND

Since the Graduate Follow-Up Survey began thirteen years ago many reports have been produced annually to report on the status of recent post-secondary graduates. In recent years several other provinces have initiated similar surveys and have used Saskatchewan's survey as a reference. Statistics Canada recently released results of its National Graduate Survey. There is an increasing interest in and need for these types of surveys as we try to understand our labour market and offer quality post-secondary education.

The Graduate Follow-Up Survey (G.F.U.) yearly reflects changes in Saskatchewan's labour market conditions, educational methods, graduates' expectations and employers' demand amid a changing economy and technology.

There is a lack of good information in this area and more can be done to gather data in the future. This G.F.U. reports results of our survey of technical institute graduates, but there are other post-secondary graduates and employers of those graduates who can provide valuable information about the labour market.

OBJECTIVES

The Graduate Follow-Up Survey gathers opinions and factual data from recent graduates which assists in evaluating the success of post-secondary training programs. The ability of these programs to meet labour market demand and the satisfaction of graduates with the programs is determined by responses to the survey.

The information collected by the survey, when analyzed, will help in the planning of future programs as well as being a source of employment supply and demand information. Graduate Follow-Up Survey reports aid potential students and counsellors in selecting programs of study.

METHODOLOGY

Graduates surveyed are those from programs at four locations: Kelsey in Saskatoon, Wascana in Regina, Saskatchewan Technical Institute (S.T.I.) in Moose Jaw and the Northern Institute of Technology (N.I.T.) in Prince Albert. Each of these supplies graduate lists which are combined with a central Student Information System to produce mailing labels for each graduate.

Graduates are from the previous year (October, 1985 to September, 1986). The survey process begins in the fall and responses represent the graduates' situation at one point in time (January, 1987) when the survey is completed. All graduates of the programs surveyed receive a survey questionnaire.

The programs represented here are the longer institute programs (those 12 weeks or less are not included) and may be one or two year programs. This survey does not include Apprenticeship programs or Saskatchewan Skills Extension Programs. Programs with a very small number of graduates, upgrading, extension or special programs are not included. First year completers of a program requiring two years to graduate are not included, nor individual modules of a larger program. Also, some new programs do not yet have enough graduates to be surveyed. Institutes with competency-based programs may have graduates who complete at various times of the year.

The first mailing to graduates contains a survey questionnaire, a covering letter and a postage-paid return envelope. Each questionnaire identifies the graduate's name and address and the name of the program from which they graduated. About one month after the first mailing, a second mailing is made to those who have not yet responded.

Returned questionnaires are each read, comments are noted and all responses are coded for computer data entry. All responses are data entered, this year using a Lotus 1-2-3 software package. A new program, using Lotus 1-2-3 and an IBM personal computer, was designed for this year's survey. The new program allows more direct input by department staff responsible for the survey and more flexibility in implementing changes and designing reports. Analysis of each training program's responses is summarized on a single page.

USERS' GUIDE

The report is organized in five sections by type of program: Business, Health, Industrial, Service, and Technology. Within each section each page shows information for individual programs.

On the individual pages the program name and institute location are shown at the top of each page. Next, the number of graduates of that program is indicated, followed by the number of graduates who actually responded to this survey, or the number of respondents. The response rate is the percentage of graduates who responded to the survey, or the number of respondents divided by the number of graduates.

EMPLOYMENT PROFILE - This data refers to the employment situation for respondents at the time of the survey, approximately six months after graduation for most programs. In this section each percentage shown is the per cent of all respondents who answered the survey.

Training related employment is shown first and is divided into the categories of full time employment, part time employment (fewer than 30 hours per week) and self employed. Training related employment means those respondents in occupations which require or which use the skills learned in their training program.

Those respondents in employment which is not related to their training are reported under non training related employment. The respondents in non training related employment added to the three categories of training related employment equals all employed respondents.

The unemployed are those not employed but looking for work when the survey was conducted. Also included with the unemployed are those not looking for work because they are on lay-off and expect to be recalled soon, or those starting a new job soon.

Respondents shown as not in the labour force are those not employed but not looking for work for reasons such as family responsibilities, disability, pursuing further education, travel or those discouraged with looking. All respondents are represented as either employed, unemployed or not in the labour force. The employed plus the unemployed are equal to the labour force for the population.

"Respondents not presently employed who have worked at some time since graduation (any occupation)". These are respondents who were not employed at the time of the survey but who had worked at some time since they graduated. They may have worked in a training related or non training related job. Seasonal workers not employed at the time of the survey (in January-February) may have been employed earlier when demand for their occupations was higher. This may be the case with some Industrial programs.

"Respondents who thought they could not have obtained their present job (any occupation) without completing the program". Respondents were asked if they could have obtained their present job if they had not completed their program. Whether employed in a training related or non training related job, these respondents thought completion of their program helped them in obtaining their present job.

TRAINING RELATED EMPLOYMENT

Most Common Occupations
These are the occupations of respondents with employment related to their training. The occupation names correspond to the Canadian Classification and Dictionary of Occupations categories at the four digit level. This classification system for occupations was developed by the Federal government and classifies occupations in various levels of detail. The per cent of training related employed respondents in each occupation is shown.

Most Common Industries
These are the industries of the respondents' employers. The names correspond to codes (at the two digit level) from the Standard Industrial Classification System as applied to Saskatchewan. The per cent of training related respondents employed in each industry is shown next to the industry name.

Location of Employment
For those respondents employed in training related jobs, percentages are given for each location of employment. Cities, towns and villages are shown for Saskatchewan. Province or country is given for those outside of Saskatchewan. Where there are many locations of employment, the term "Sask. (various)" is used. Where those in Saskatchewan did not identify their location the term "Sask. (other)" is shown.

Average Monthly Salary (Full Time)
This is the average gross salary (on a monthly basis) of the respondents in training related, full time jobs who chose to report this information.

PROGRAM EVALUATION - All respondents could answer this question. The percentages are a per cent of total respondents. If some respondents did not indicate a quality ranking then these may not add to 100% (the difference is those who did not indicate a ranking). Respondents were asked to rate the "overall quality" of the training program they completed as one of the choices: excellent, very good, good, poor, very poor. Poor and very poor are combined for reporting purposes since the responses to these are fairly low.

HISTORICAL INFORMATION - The Graduate Follow-Up Survey has been conducted for several years, and reported here are some past survey results. The rates here refer to the results of each year's survey. Therefore, results for 1982 graduates are from our survey done in early 1983, about six months after graduation. 1986 results are from this year's survey. Rates shown are Full Time employment only (not including Part Time or Self Employed) and in each case rates are a per cent of all respondents. The two categories shown are for the rate of full time employment in only training related occupations and for the rate of full time employment in all occupations (including training related and non training related). For 1986 the full time, training related employment rate will be the same as that shown under Employment Profile - Training Related Employment - Full Time. The 1986 All Occupations rate is not shown elsewhere, but would be the full time training related employment rate plus the full time employment rate for non training related employment.

NOTES - These indicate further details about respondents' status, or a description of characteristics of the program.

"* represents 1 respondent" refers to a percentage which represents only one respondent and so corresponding information is for one person only.

"Percentages subject to greater variation because of small number of respondents". This is noted when the number of respondents is less than ten. Response rates are from about 50% to 100%, but some classes are small, so a small number of respondents may result. In this case each percentage may represent only a few respondents even though it appears to be large. A change in the status of one respondent could significantly vary the results in very small classes. Results for these classes should be used cautiously and in reference to the actual number of respondents represented.

In some cases the actual number of full time, part time or self employed respondents is given, especially when the number of part time or self employed is large relative to the number of full time respondents.
If the number of part time is large then the per cent of part time looking for full time employment is given. These numbers apply only to those in training related employment.

If those employed in non training related employment are large relative to those in training related employment, the actual number of respondents in each category may be shown.

When the per cent of unemployed is large, then actual numbers of unemployed respondents may be shown.

If those not in the labour force is large then the number of respondents is given. When all or the majority of those not in the labour force have returned to school, then this is indicated.

Program characteristics which may be noted:

Competency-Based Learning System - for some Wascana and most N.I.T. programs, this designates programs where students progress at their own pace and graduate at various times throughout the year.

Cooperative Education Program - programs at S.T.I. which alternate periods of employment with classroom studies.

Subject to Seasonal Employment Demand - designates programs, such as in construction, where demand for graduates is seasonal and may not be at its peak when the survey is conducted (in winter).

Salary often on a Commission Basis - even though quoted salary is for full time employment the salary may be low if it is based on commission only.

New Program - this program has not been surveyed previously in the Graduate Follow-Up Survey.

Graduates may go into Second Year of Program - some programs have the option of receiving a Certificate after one year or taking a second year to receive a Diploma. If a large number of graduates of a one year program are not in the labour force then they may have gone on to take the second year of the program (returned to school).

If a program is being transferred to another location, being phased-out, or not being offered in the future, then this is noted.

Each program has its own characteristics and further and more detailed information should be obtained from an Institute calendar or by writing to one of the Institute locations.

Appendix

1986 Survey Questionnaire

Saskatchewan Education

1986 Graduate Follow-Up Survey

Please indicate any changes to label

Please assist us by completing all questions which apply to you. Information provided is treated as confidential and is for statistical purposes only.

PERSONAL DATA

1. When did you complete the above program? Month: ☐☐ Year: ☐☐
2. Please check (✓) Male ☐ 1 Female ☐ 2
3. Age: ☐☐

EMPLOYMENT STATUS

4. Are you presently employed? (e.g. full-time, part-time, self-employed)
   Yes ☐ 1--→ If "Yes" please continue with **question (5)**
   No ☐ 2--→ If "No" please go directly to **question (20)** (page 3)

5. Is your employment:
   Full-Time ☐ 1--→ If Full-Time please continue with **question (6)**
   Part-Time ☐ 2 (fewer than 30 hours per week)
   Self-Employed ☐ 3
   5a. If Part-Time or Self-Employed, are you looking for Full-Time paid employment? Yes ☐ 1 No ☐ 2
   Please continue with question (6)

6. Is your employment:
   Permanent ☐ 1--→ If Permanent please continue with **question (7)**
   Temporary ☐ 2 (expected to end at a definite date in the future)
   6a. If Temporary, are you looking for Permanent employment? Yes ☐ 1 No ☐ 2
   Please continue with question (7)

7. Please check (✓) only ONE of these to describe how you obtained your present job:
   Through Canada Employment Centre ☐ 1
   Assistance from instructors ☐ 2
   By responding to an advertisement ☐ 3
   Through a contact (friend, relative, etc.) ☐ 4
   By personal visit or sending resume to employer ☐ 5
   Returned to a previous employer ☐ 6
   Other ☐ 7, Specify _____

Please Continue On Page 2

EMPLOYMENT STATUS

8. Prior to graduating did you have previous work experience related to this job? Yes ☐ 1 No ☐ 2

9. Could you have used help in any of the following areas?
Please check (✓):
Career counselling ☐ 1
Resume writing ☐ 2
Interview skills ☐ 3
Job search techniques ☐ 4
Job leads/employer contacts ☐ 5

10. What is your present job title/classification? _____ C.C.D.O.

11. What duties (type of work, activities) do you perform? _____

_____

12. What was your approximate starting monthly salary before deductions?
$ [ ] per month.

13. What kind of business/service does your employer have?(e.g. hospital, retail store)_____ S.I.C.

14. Name of organization/business: _____

15. City and Province: _____ S.H.S.P.

COMPARING YOUR PRESENT JOB WITH THE TRAINING PROGRAM YOU COMPLETED:

16. Could you have obtained your present job if you had not taken your training program? Yes ☐ 1 No ☐ 2

17. Do you think your present job is directly related to the education and training you received from your training program?
Yes ☐ 1--→ If "Yes" please continue with **question (18)**
No ☐ 2--→ If "No" please go directly to **question (19)**

18. How well did your training program prepare you for your present job?
Very Well ☐ 1 Adequately ☐ 2 Inadequately ☐ 3

PLEASE GO DIRECTLY TO QUESTION (26) (page 3)

19. If you are not in a "training-related" job - Please check (✓) the ONE single reason which best describes why you do not have a training-related job:
Do not have enough experience ☐ 1
Training inadequate ☐ 2
Training-related jobs not available ☐ 3
Cannot find a training-related job in preferred location ☐ 4
Restricted by seasonal employment opportunities ☐ 5
Pursuing different career/interests ☐ 6
Other ☐ 7, Specify _____

PLEASE GO DIRECTLY TO QUESTION (26)(page 3)

NOT EMPLOYED

*20. If you are not presently employed - Have you worked at all since completing your program? Yes ☐ 1 No ☐ 2

20a. If "Yes", was the job directly related to the education and training you received? Yes ☐ 1 No ☐ 2

21. Are you presently looking for work?
Yes ☐ 1--→ If "Yes" please continue with **question (22)**
No ☐ 2--→ If "No" please go directly to **question (25)**

22. How long have you been looking for work? ☐ Month(s)

23. Which ONE single reason best describes why you cannot find a job?
Please check (✓):
Cannot find a job in preferred location ☐ 1
Restricted by seasonal employment opportunities ☐ 2
Jobs related to training not available ☐ 3
Other jobs not available ☐ 4
Do not have enough experience ☐ 5
Training inadequate ☐ 6
Other ☐ 7, Specify _____

24. If you cannot find a job, would you:
Relocate ☐ 1 Retrain ☐ 2 Both ☐ 3 Neither ☐ 4

PLEASE GO DIRECTLY TO QUESTION (26)

25. If you are not presently looking for employment which ONE single reason best describes why you are not looking for work?
Please check (✓):
Illness or disability ☐ 1
Personal or family responsibilities ☐ 2
Pursuing further education ☐ 3 Name of program _____
Discouraged with looking ☐ 4
On lay-off, expect to be recalled ☐ 5
Will be starting new job soon ☐ 6
Other ☐ 7, Specify (travel, other interests, etc.) _____

PLEASE CONTINUE WITH QUESTION (26)

TRAINING PROGRAM EVALUATION

CONSIDERING THE TRAINING PROGRAM YOU COMPLETED:

*26. Should the program cover: More ☐ 1 Less ☐ 2 Same material ☐ 3

27. Should the program be: Longer ☐ 1 Shorter ☐ 2 Same length ☐ 3

28. Should subjects/courses be: Same ☐ 1 Different ☐ 2,
Specify _____

Please Continue On Page 4

TRAINING PROGRAM EVALUATION

29. Should some subject material be updated? Yes ☐ 1 No ☐ 2
